

du has introduced a 24Mbps home broadband service which it claims is the fastest available in the Middle East. It's AED 749 per month, and even if you don't want to pay that much it might be worth looking at du's offerings because prices for online services at lower speeds have been trimmed or accelerated or both. The previous AED 449 per month package is now 8Mbps rather than 4Mbps; and the former 8 Mbps option is now 16 Mbps and AED 50 cheaper at AED 549 per month
