

**Name:** Mana

**Sex:** Female (spayed)

**Age:** Approximately ten months old

**History:** Abandoned at a construction site in the Shamkha area, Mana was actually spotted by the foreman of the building site as she was thrown from a car. He called in SAD to help, and volunteer trappers were called out to collect her. If this kind man hadn't reported the incident, Mana would have struggled to survive in temperatures of 46°c degrees and above with no food or water.

**Personality:** You couldn't ask for more with Mana. This medium sized beauty is reserved, quiet, and calm – not to mention incredibly sweet and docile. Naturally a little traumatised after the incident, Mana will need a family with the time and patience to help her regain her confidence.

Mana has been vet-checked, vaccinated, spayed and is ready and waiting for her forever family to adopt her. For more details about her or any other SAD dogs, visit the SAD website at [www.straysofabudhabi.com](http://www.straysofabudhabi.com)
